About Me

I am a professional passionate about technology and education. I work as a Systems Analyst at PRODAP, where I develop and provide support for governmental systems of the State of Amapá, in addition to developing systems for private companies. I have experience in software development using frameworks such as Django, Laravel, FastAPI, and others. My goal is to contribute to innovation and to improving quality of life through technology and education.

I am resilient, always seeking to learn and adapt quickly. I value teamwork, have a strong sense of responsibility, and am capable of performing well under pressure.
